DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37, drawn to a facsimile device having a plurality of memory boxes, classified in class 358, subclass 1.15.
 - II. Claims 38-41, drawn to a facsimile device or a memory medium computer programs for controlling a facsimile device with first and second memories wherein the second memory stores information corresponding to the contents information and judgment results by a judgment device, classified in class 358, subclass 404.
 - III. Claims 42-46, drawn to a facsimile device or a memory medium computer programs for controlling a facsimile device with two transmission devices wherein the second transmission device transmit information corresponding to judgment results by a judgment device, classified in class 358, subclass 444.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the facsimile device in group I has a plurality of memory boxes storing first

Art Unit: 2622

image data which according to a command specifying a memory box, an image transfer device transferring the image data stored in that specifying memory box or in a different memory box.

The subcombination of group II has separate utility such as a second memory for storing contents information for indicating memory contents stored in the first memory and for a second transmission device to read the contents information and transmitting the read contents to the calling side. The subcombination of group III has separate utility such as a second transmission device for transmitting the information corresponding to judgment results by the judgment device to the calling side.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Madeleine AV Nguyen whose telephone number is 703 305-4860. The examiner can normally be reached on 8:30-6:00.
